PROJECTS

LOLFinder: League of Legends Profile Search App
Flutter
- Built a cross-platform mobile application using Flutter and Dart to query and display real-time player statistics
- Integrated the Riot Games API for asynchronous data fetching and parsed complex JSON responses for profile visualization
- Designed a UI supporting seamless navigation and summoner data input across multiple screens
- Implemented state management to maintain a smooth, responsive experience across various screens

Pomodoro: Study Timer
iOS / SwiftUI
- Built a productivity-focused iOS application using SwiftUI to help users manage focus and break sessions
- Developed precise timer logic and managed the app life cycle to ensure persistent background performance
- Integrated local notifications to alert users upon session completion

Survive and Find Star: 3D FPS Game
Unity
- Developed an action-oriented 3D game using Unity and C#, implementing character movement and combat mechanics
- Engineered enemy AI behaviors and implemented core gameplay loops
- Refined gameplay balance through iterative testing and performance optimization

EXPERIENCE

Server October 2023 – Present
Pelicana Chicken Atlanta & Chou's Kitchen *Atlanta, GA & LaGrange, GA*
- Collaborated within fast-paced team environments to deliver consistent, high-quality customer service
- Demonstrated multitasking and problem-solving skills under strict time constraints

EDUCATION

Georgia State University
Bachelor of Science in Game Development. Dean's List, Fall 2024. *In Progress, 2021 – Present*
Relevant Coursework: GSU PantherDev (Student Game Development Organization)

SKILLS

Languages: Swift, Dart, C#, JavaScript, HTML, CSS
Frameworks & Engines: SwiftUI, Flutter, Unity
Architecture & Concepts: MVVM, REST API Integration, App Life Cycle Management
Tools: Xcode, Android Studio, Visual Studio Code, GitHub
Languages (Spoken): Korean (Native), English (Fluent), Japanese (Conversational)
